SYNOPSIS

On June 8, 2017, SA ██████████ and ASAC ██████████ conducted surveillance of the Port Imperial Marina in Weehawken, New Jersey.

DETAILS

On June 8, 2017, at approximately 10:27 a.m., Special Agent (SA) ██████████, Environmental Protection Agency (EPA), Criminal Investigation Division (CID) and EPA CID Assistant Special Agent in Charge (ASAC) ██████████, conducted surveillance of the Port Imperial Marina in Weehawken, NJ via boat. Agents were taken out on an unmarked Department of Environmental Conservation (DEC) boat, with the assistance of DEC Officers Waldemar Auguscinski and Christopher Macropoulos. ASAC ██████████ and SA ██████████ both took photographs.

During the surveillance SA ██████████ observed ferry boats docked at the Port Imperial Marina, the Port Imperial maintenance dock and several ferry boats in transit. The Port Imperial Marina is the main passenger ferry terminal located at 4800 Avenue at Port Imperial in Weehawken, NJ. The Port Imperial maintenance dock is located at 1500 Avenue at Port Imperial, just south of the main ferry terminal. SA ██████████ observed the John Stevens, Betsy Ross and the George Washington docked near the maintenance docks next to ██████████ Restaurant. The Molly Pitcher, Thomas Jefferson and the Jersey City were traveling to or from the marina. SA ██████████ observed the Abraham Lincoln, Alexander Hamilton and the Bayonne at the Port Imperial Marina.

During surveillance there was little movement seen on the ferry boats. There were two men seen on the stern of the Betsy Ross, that was tied up at the work dock. There were three men seen walking around a rusty floating dock adjacent to one of the ferry boats tied up to the work dock, and one man seen watching the unmarked DEC boat. At approximately 10:50 a.m., when the man was spotted observing the unmarked DEC boat, surveillance was terminated.

The pictures taken during surveillance will be downloaded onto a CD labeled, "Master" by SA ██████████. The Master CD will be maintained and stored in the NYAO evidence room. A chain of custody will be generated accordingly.
